They can go all night — How quickly can they stop?

Their ability to GO is unquestioned.

Their ability to STOP, in many cases, is a matter of hoping.

The wise driver thinks as often of his brakes as he does of his motor.

Perhaps that is why so many of our townspeople are driving in and ordering Johns-Manville Asbestos Brake Lining put on their cars.

They know it is the best and we put it on with no lost motion!

Have You ever Stopped to Consider

That a Locomotive Engineer would not think of starting on a run without first giving his brakes a thorough testing? Your automobile should have the same careful testing of its brakes because it is more dangerous to the public, due to the fact that all streets are tracks for your automobile.

them with Johns-Manville Asbestos

Let good
brake
lining
save
you

A sudden dash from a side road, frantic jamming of worn out brakes, and your car joins the others on the junk pile. Faulty brakes are to blame for most accidents—any police department will tell you that.

Perhaps that is why so many of our customers are driving in to have their brakes relined with Johns-Manville Asbestos Brake Lining.

They know it is the best—and we put it on with no lost motion!
