

Here is the *Genco Light* Plant

Which Makes Electricity on the Farm A Practical Reality

This outfit brings electricity to your door. If you have a little room to spare, install a Genco Plant and you will have an ideal power and light plant which will light your home and do your work, or your wife's work, at any time, day or night.

This plant will give you every convenience the city dweller has—it will give you more. You will have dependable gas engine power for many tasks for which power can be delivered by a belt.

Now, is there a single machine or outfit that you use on your place—is there a single implement which will provide as much in convenience, as much in real value, or save as much in real labor for every member of your home as is provided by the use of the Genco Light

Manufactured by the

GENERAL GAS-ELECTRIC CO., Hanover, Pa.

The only manufacturers of lighting plants in the world making their own engines, generators and batteries. Which means that "we will be in business when others will be gone." If interested send for Technical Description of Genco-Light. See this plant before buying elsewhere.

**A Scientifically Designed
Electric Light and Power
Plant For Your Farm**

The *Genco Light* Plant

Is built on the principal of the modern automobile and airplane. It is water cooled and is of the four cycle type.

It burns kerosene or gasoline and has a pulley which can drive a pump, washer or churn while charging.

It will charge your automobile batteries without removing them from the car.

The General Gas-Electric Co., Hanover, Pa., manufactures their own engine generators and batteries, and has a capital of over a half million dollars, which means they will be in business when others are gone.

"Home Again!"

Cooking for the boy who has come back is mother's biggest pleasure these days. And the new Detroit Vapor Stove makes it certain that the mother-made pie or cake he longs for will be perfect.

Perfect, thorough and rapid baking and cooking make this stove appreciated by every household. Although it burns oil, it is comparable only to a gas range in its powerful, instantaneously efficient burners with their sturdy construction and their ease of control.

Detroit Vapor Oil Stoves

No Wicks

Light Instantly

Work Like Gas

A Detroit Vapor Oil Stove gives the same service and convenience as the modern city gas range and at a much lower cost. It is more economical than either gas, coal or wood. Burns 19 hours to a gallon.

There are no wicks, asbestos rings or wick substitutes of any kind in the Detroit Vapor Oil Stove. Heavy durable iron burners vaporize the oil giving an intensely hot blue flame right under the cooking utensil.

Baking Demonstrations in Bowman's Store Building, Saturday, May 10 and 17.
