The motorist wherever he may be is always making demands upon the service station for efficiency, courtesy, and completeness of service and only those who have been able to meet the requisites which particular and discerning motorists are setting up have achieved any marked degree of success in their field.

To this end it is well to note the work which is being done in the Tryon Garage, owned and operated by the well known John S. Tryon, whose garage at Florin has been established for the past nine years.

During that time, Mr. Tryon has built up an enviable patronage among the motorists of this section who are cognizant of the fact that his products are superior and that his service is as good as any offered in this section.

A full line of gas, oil, accessories of all sorts are offered for the car. Expert repair service on all makes of cars is done under the personal supervision of the owner whose wide experience in the field has netted him thorough acquaintance with the many auto problems. Storage space is available in the garage.
