DANGER

Running Drains!

ded to carry away all waste and filth—
all possibility of danger to health.

to the inside of the pipes in bathroom,
Especially in the "trap"—that bend
s the last of the flow.

! With moisture, warmth and nutri-
s that typhoid, diphtheria, smallpox
side out," you would scour them regu-
scour" them inside—with Mule-Kick,

Kick prevents all clogging annoyance.

ODORLESS!

at makes faster action, so simply use boiling
ter; chemicals can't make it any hotter.

The deceitful bubbling is a waste of cleaning
length and a discharge of explosive gas. It fre-
quently causes serious injury. Its fumes are always
mful.

Mule-Kick does not pretend to boil. It is safe to
p, pure, powerful and odorless.

Mule-Kick will not injure the plumbing.

ing money by false pretense

SAULT PLUMBER INJURED.

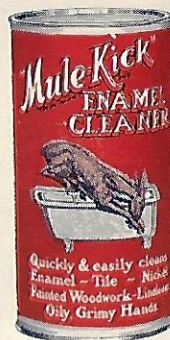

Sault Ste. Marie, Ont., Jan. 8. —
(Special.)—Charles F. Hitch, plumb-
er, is in the General Hospital, suf-
fering from injuries to his face and
eyes as a result of an explosion of
a solution with which he was open-
ing up a frozen sewer.

PRODUCT—

THE CLEANEST WATER DIMS YOUR PLUMBING FIXTURES

A BATHROOM drinking glass
is soon clouded by the cleanest
water. How hard it is to rub those
"frosty" stains away! So it is
with the glassy surface of your
plumbing. The cleanest water
dries away and leaves the same
"frost." Then scum and rust
quickly cling.

Harsh "kitchen cleansers" may
take away the dirt but they scratch
away the glassy surface, too.
Change to M-K Enamel Cleaner and you
will take a new pride in all your

plumbing fixtures.

M-K cleans—without damage
—without hard work. Try it on
stains you thought impossible to
remove. Try it on rust and alumi-
num marks in the sink.

M-K polishes as it cleans. It
brings out the hidden gloss.

In kitchen and bathroom use
M-K for a new cleanliness—a new
satisfaction. It can not hurt the
skin. *It leaves no odor.* It costs a

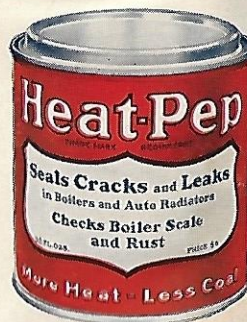

little more than ordinary cleaners but
goes three or four times as far.

HEAT-PEP Boiler Treatment

HEAT PEP seals cracks and leaks. Better still,
a Heat Pep treated boiler will not leak. To
avoid expensive mechanical repairs and the risk
of shutting down in cold weather—simply treat
your boiler with Heat Pep each Fall.

Heat Pep also is a definite check to scale and
rust. You can see how it cleans your boiler by
the way it cleans the gauge glass. Even so little
as 1-16 inch thickness of water-scale increases
your fuel bill 13%—\$1.83 extra for each ton of
coal you ought to use.

Use Heat Pep Treatment each Spring and Fall. It
prevents leaks, saves coal and peps up your boiler.

What Your Boiler Needs

Your boiler needs protection against leaks in
cold weather when you can't afford to have the
fire go out. Every boiler needs to be kept clean
—free from the water-scale and rust that keep
heat out of the water and waste your fuel.

NEW LIFE for ALL YOUR FAUCETS

New life for your faucets comes with
Sexauer Easy-Tite Cushions. All the ad-
vantages of common double-seat cushions,
but *re-enforced* like a tire with layers of
special fabric. See the cut-open picture.

Easy-Tite can't break, split or crumble.
It can't squeeze out. Yet, like a tire, it
yields to compression—gives easy action
and saves the faucet.

Easy-Tites are especially recommended
for the severe conditions of your Hot
Water faucets. Easy-Tites are coated with
the Film of Protection which keeps them
"fresh made" when they go into your
faucets. Look for the name Easy-Tite
molded in the cushion.

"EASY-TITE" FAUCET CUSHIONS

Just a finger flip shuts off the drip!

The common fibre washer is so hard
that it grinds away the faucet metal.
Imagine such a hard ring on a fruit jar!

The ordinary double-seat "cushion"
is good while new, but it is likely to
split or crumble, or to squeeze out
like an old ring on a fruit jar.

Re-inforced Easy-Tite is built like a
tire—as this cut-open picture shows.
It shuts off easily without wearing
the faucet. It lasts much longer be-
cause it can't split, crumble or spread.

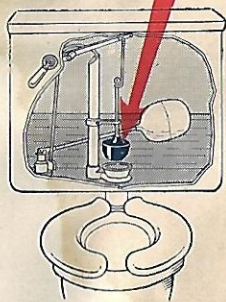

—A SEXAUER PRODUCT

The Critical Part of your Toilet Flush

YOU move the flush handle. A rubber bulb jumps off the flush valve. The water is released. The tank drains and the bulb slams down. The flush shuts off. The tank refills. Time and again. Year in and year out! That is why the rubber bulb is called *the Critical Part of Your Toilet Flush*.

If the tank bulb fails to hold its shape or size, it makes a leak. Then through the night you hear the trickling leak and the hissing rush of water that constantly refills the tank.

Annoyance. Unsightliness. Water waste—up to 300,000 gallons a year—for which you pay in water bills, taxes, or higher rents.

All this ends for three full years or more when you install the "Blue Spot" Balloon—the Sexauer tank bulb recommended by better plumbers everywhere.

Made of virgin rubber, 97% pure, the "Blue Spot" Balloon retains the long-life quality that Nature gave the rubber. Unadulterated and specially cured, it resists elongation, holds its true shape and outlives all others.

SEALS TIGHT!

LIFTS EASIER!

IMPROVES THE FLUSH!

Under water pressure the Genuine Balloon acts like a tire. It expands inside the valve and "makes tight" instantly on old, uneven and corroded valve seats. It often saves the cost of a new valve.

So buoyant, it floats even if filled with water. Also has 25% Extra Air Space. Lifts at a child's touch—assures a more complete flush. Demand the Genuine Balloon—the Bulb with the "Blue Spot."

THE BLUE SPOT!

Look with confidence upon the Blue Spot. It marks the Genuine Balloon—like Sterling on Silver. It assures you a priceless service—the very essence of economy. The Genuine Balloon saves cost of new bulbs, expense of replacing, waste of water and gurgling annoyance. Guaranteed for 3 years.

A Sexauer Product—Sold by Better Plumbers Only

What if all the Water were Gone?

IF you awoke some morning and found there was no water in the house you would call a Plumber. But suppose you also found there were no Plumbers and not a drop of water in town, what then? You would realize that death had squatted on your doorstep.

Next to air, water is the most important thing in life. And of all the world's work none is more important than that of the Plumber.

Buried in the walls and floors of your home is a complicated system of piping, valves and drains, quite similar to the arrangement of certain details of the human body itself and

likewise requiring trained hands to care for it when out of order.

Your Plumber is a sanitary engineer who installs and keeps in good order that network of pipes, valves and drains. He causes water to flow into your home and waste to flow out. The water brings Health, Cleanliness and Comfort into the home. The waste carries off the poisons which would breed disease and cause death.

Your Plumber, you see, is more than "a man in overalls with a bag of tools." He is your community doctor who promotes health and prevents disease.
